Citavi Web - Data Migration

From Citavi Web …

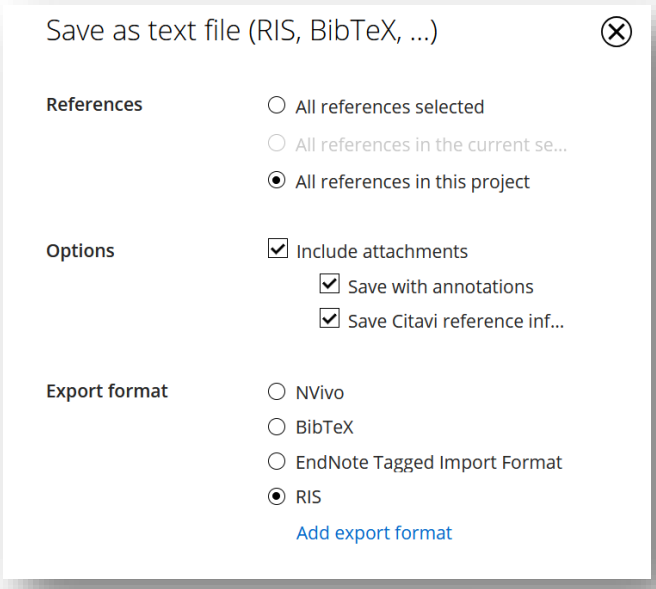

Good to Know
You can export bibliographic sources, associated files as PDFs, and the highlights you've added to them. Knowledge elements such as citations, notes, comments, and others are not exported.

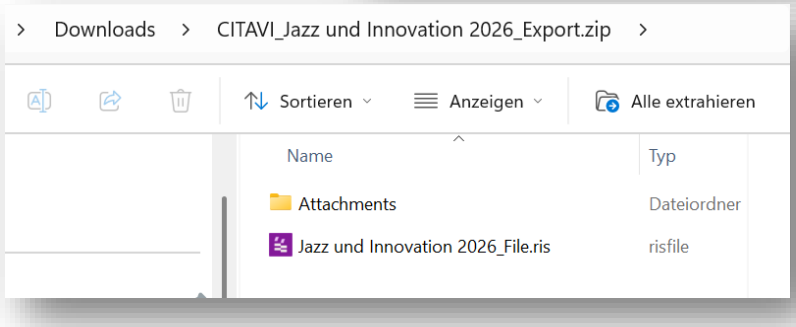

1 Each project must be exported individually from Citavi Web. To start the export, click the three dots at the bottom of the project window …

2 Then select :
Export - To a text file (RIS, BibTeX, …)

3 Click the options as shown in the figure

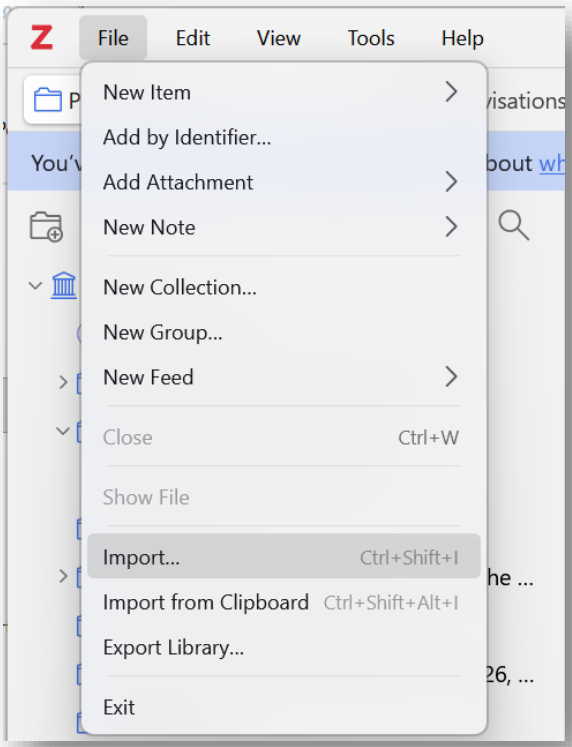

4 A ZIP file will be created. Unzip it into your Downloads folder: There you will now find a file with the .ris extension and a folder containing the attachments (PDFs).

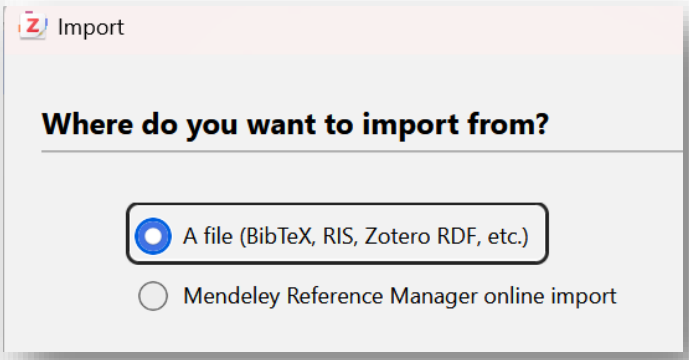

Reuse as OER is encouraged: This work and its contents are—unless otherwise noted—licensed under CC BY 4.0. Disclosure pursuant to TULLU-Regel Please do it as follows : *„Citavi-Projekte nach Zotero importieren: Schritt-für-Schritt-Anleitung“ by Detlev Bieler und Florian Hagen, License: CC BY 4.0*. As of October 2026.

… to Zotero

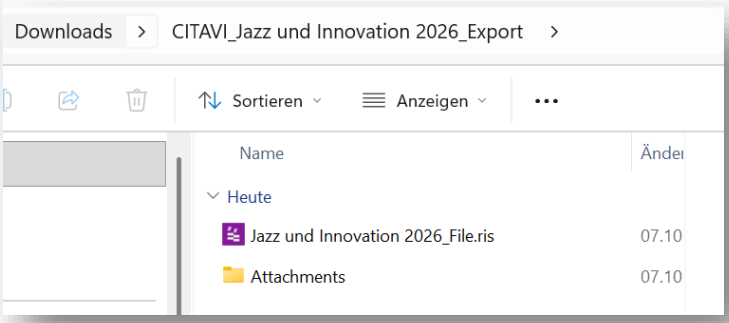

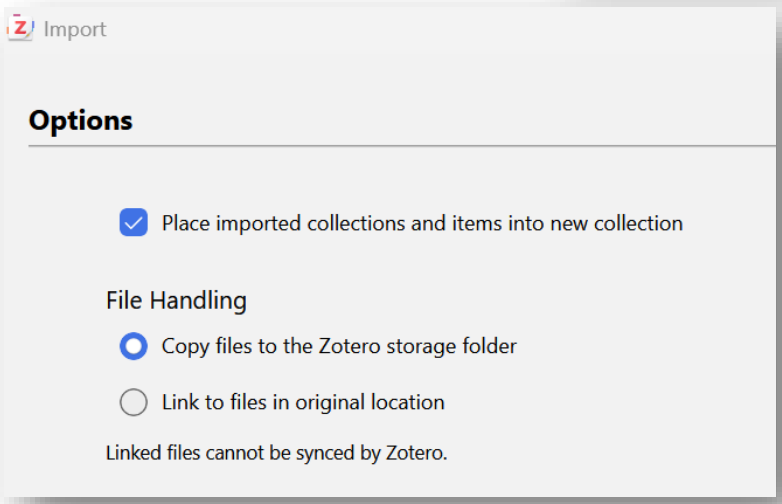

5 Choose in Zotero: File – Import…

6 … then: A file (BibTeX, RIS, Zotero RDF, etc.)

7 You'll find the file you want to import in the folder you created earlier. Select the file and then click Open…

8 Click the options as shown in the figure

The literature sources and their corresponding PDFs from your Citavi project have now been added to a Zotero collection.
